

# Powerlink<sup>®</sup> Ad-Hoc Reporting

*Powerlink data has never been easier to access and analyze*

Powerlink Ad-Hoc Reporting enables you to easily create custom reports and analyses of your Powerlink data. Intelligent views of Powerlink data enable you to easily identify and select the data you want to create reports within Microsoft Excel<sup>®</sup>. As well, pre-defined report and dashboard templates can be used as-is or modified to meet your requirements.

## **Minimum Requirements**

- Powerlink 3.2 or higher
- Microsoft SQL Server 2008 R2 or higher
- Microsoft Windows 10 (64 bit recommended)
- Microsoft Excel 365 (64 bit recommended)

## **Reporting Made Easy**

- Intuitive data views make it easy to find data for creating ad-hoc reports.
- Pre-defined report templates simplify reporting for all users.
- Utilizes the world's most familiar reporting tool, Microsoft Excel.
- Can be used with other reporting, analytic, and data visualization tools.
- Fully integrated with your Powerlink data.
- Off-loads report processing to a separate report database.
- Nightly process updates reporting database.
- Runs on Powerlink servers, primary PCs, and PowerStations.
