

Simplify the physical inventory process

And update Powerlink in real time

Maintaining accurate inventory records is crucial to a well-run yard. Inaccurate records can cause wasted time, missed sales opportunities, and lost revenue. Integrated with Powerlink, the Move-It app simplifies the process of setting a part's inventory location, moving parts en masse from one location to another and auditing inventory locations – reducing the time, hassles and errors associated with physically locating parts.

Easy and effective

Simple and intuitive Android-based app enables users to easily:

- Update Powerlink inventory records in real time
- Keep inventory locations and quantities accurate
- Delete lost or damaged parts from inventory
- Flag missing parts for follow up
- Audible tones confirm actions and sound alerts
- Logging tracks who moved parts and why
- Using the device's or an external barcode scanner speeds data entry and reduces errors

Move-It is provided at no charge and is available for download in Google Play.

Three efficient workflows:

1. Setting and managing an individual part's location

2. Moving groups of parts from location to location

3. Auditing inventory locations
